

# VERIDIUM & CITRIX BETTER TOGETHER

Increase employee convenience, productivity, and enterprise security at a lower total cost of ownership with the Veridium platform for all your Citrix environments.

Veridium is the only company that can unlock a Citrix virtual desktop via biometrics from a smartphone, due to its seamless integration with Citrix's Federated Authentication Services.

**"Veridium provides biometric authentication of remote users in a streamlined, secure way, complementing Citrix solutions and enhancing customer mobility."**

*— Nabeel Youakim, Citrix Vice President of Products & Strategic Partners*

## CITRIX

### INNOVATION HIGHLIGHTS

**ELIMINATE** passwords

**UNLOCK** Citrix virtual desktops

**SEAMLESS** integration with Microsoft AD & Citrix FAS

### BENEFITS

- Increase security with biometric authentication
- Create a zero trust identity strategy
- Improve productivity and convenience for end users
- Simplify login procedures across your Citrix environment
- Lower total cost of ownership by eliminating tokens and reducing password reset support costs

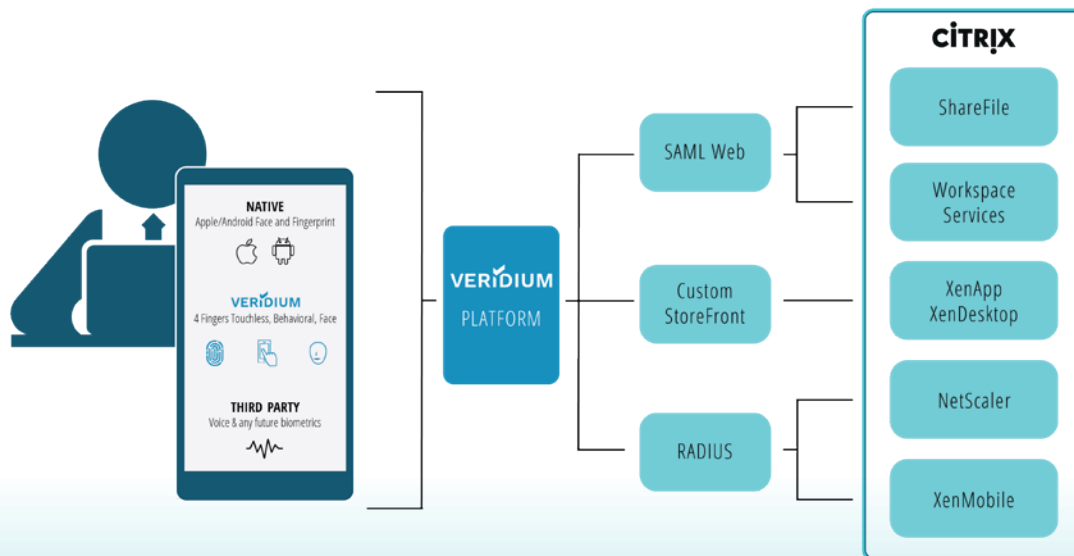

### SECURE ALL YOUR CITRIX ENVIRONMENTS

Veridium provides strong multi-factor authentication for the following:

- Citrix StoreFront
- Citrix NetScaler
- Citrix ShareFile
- Citrix XenApp/  
XenDesktop
- Citrix Workspace  
Services

# INTEGRATION CAPABILITIES

“[Veridium is] a robust and flexible solution for Windows AD integration.”

— Ant Allan and Tricia Phillips,  
Gartner Technology Insight for  
Biometric Authentication 2017, 2018

## MULTIPLE WAYS TO CONNECT TO CITRIX

- Customized Certified StoreFront plugin
- SAML services for connecting to both StoreFront and NetScaler
- RADIUS protocol for NetScaler push authentication scenarios
- Robust integration with Microsoft Active Directory (AD)
- Seamless Integration with Citrix Federated Access Services (FAS)
- Geo-location reporting for conditional access to Citrix desktops and applications
- Software-only solution

## FEATURES

- Eliminate passwords
- Strong multi-factor authentication using what you are (biometrics) and what you have (smartphone)
- Flexible biometric platform that meets security needs and satisfies user preferences
- Simplify remote login user experience without cumbersome tokens
- Validated Citrix Ready 2FA solutions for XenDesktop, XenApp, NetScaler, and ShareFile
